How to Add or Edit a Blog Post

No programming needed. Your website updates itself after you save a change.

Option A — Edit on GitHub (easiest, no software)

> **1.** Go to your repository on github.com and open the folder `src/content/posts/`.

> **2.** Click **Add file** → **Create new file**.

> **3.** Name it like `my-new-post.md` (lowercase, dashes, ends in `.md`).

> **4.** Copy the FULL template below, paste it, then replace the text with your own:

```
---
title: My New Post Title
date: March 2025
pubDate: 2025-03-15
excerpt: One sentence summary that appears on the blog list page.
tag: SEO
gradient: linear-gradient(140deg, #0e1a18 0%, #0c0c0a 100%)
---

# My New Post Title

Write your introduction paragraph here. Explain what the post is about in two or three
sentences.

## First section heading

Write the content for this section. You can use **bold** and *italic* text.

- Bullet point one
- Bullet point two
- Bullet point three

## Second section heading

1. Numbered step one
2. Numbered step two
3. Numbered step three

## Conclusion
```

```
Wrap up the post with a short summary and a call to action.

> A quote or highlight can go here.
```

> **5.** Click the green **Commit changes** button. The site rebuilds in 1–2 minutes.

> To edit an existing post: open the file, click the pencil icon, change text, commit.

> To delete a post: open the file, click the trash icon, commit.

Option B — On your computer (double-click)

- Double-click `new-post.bat` → type a title → a file opens in MarkText (if installed) or Notepad.
- Write the post, save, close.
- Double-click `delete-post.bat` to remove a post (choose number, confirm).
- To publish: open terminal in the folder and run `git add .`, `git commit -m "update"`, `git push`.

Writing tips (Markdown)

- `# Big title` and `## Smaller title`
- `**bold**` and `*italic*`
- `- item` for bullets, `1. item` for numbers
- Leave a blank line between paragraphs.
- Add images: put them in the `public/` folder and use `![description](/image.png)`.

Notes

- The `excerpt` is the short preview text on the blog page.
- The `tag` is the small label above the title.
- Keep the `---` block at the very top; do not delete it.
- The `gradient` line can be left as-is.
- File name should be lowercase with dashes, ending in `.md`.
